Cedar Acres Gladioli

"To create a beautiful garden is a genuine gift to life. Value in every endeavor is judged largely by its capacity for service; a service enriching, refreshing, gladdening life, or awakening it to greater effort or higher ideals. A flower-crowned garden, glowing in wondrous colors, resonant in delicate perfume, vibrant with the whisperings of nature is the very embodiment of service."—Anon.

IT IS a pretty wrong and weedy old world, but there are some golden things in it, and the crooked and tangled ways will surely be straightened out some day. There is one thing that can never turn into suffering, and that is the good we have done and the pleasure we have given. In all the pleasures known to men and women, none have been discovered comparable to the pleasure of giving pleasure. And after having done a thing once there is a tendency in the brain to do it again.

We form our habits and then our habits "get us." Before war work took all of our time the gardening habit was getting the men and women of this country, and they were planting not seeds and bulbs, tubers, and cuttings, but they were planting for hope and faith, for health and hardihood.

Our service now is to reconstruct everything—from the devastated old world down to our own neglected gardens. Gardening for flowers, for beauty, for naturalness will never again be listed as a non-essential in the lives of the American people. It is as necessary a feature of wholesome lives as good fresh air and sunshine.

*"Dry, wrinkled, ill-looking thing,
Lifeless roots around you cling,
Beauty seems gone forever.*

*Ugly, ill-shapen and bare,
Brown and shriveled, shall I ever
See you again so fair?*

"My Bulb"

Pink Perfection

WHILE hardy borders are being reconstructed, while newly planted stock is growing to blooming age, bare spots in the garden must be filled. The early blooming spring bulbs, after these the annuals, and then the gladioli, always the old reliable, for summer and fall bloom. Growing from a planting of snapdragons or salpiglossis, or from a bedding of verbenas, phlox, or alyssum, these satisfying gladioli are a never-ending pleasure. Just as there is a flower for every mood, so in the gladiolus there is a color or shade of color for every mood, for every joy and sorrow.

At Cedar Acres you will find whole fields of color melody, and this same melody goes out to the world in bulbs for your friend's garden, for your own garden, or in blooms from your own garden. Each year we have given suggestions for plantings in color or in combinations. This year we offer plans for arrangement and gift boxes as well. We feel confident that added pleasure will be given to those who so enjoy sending boxes of cut blooms to friends.

Gladiolus Amethyst, now a prime favorite, was used most effectively with Pink Perfection. We know of no flowers but tulip La Rêve, and a few chrysanthemums, which have the coloring of Amethyst. The soft heliotrope, suffused rose, is always well placed when used with the creamy buff of

Niagara or Loveliness. Amethyst or Prince of India with Baron Hulot make a truly Persian combination.

Gladiolus Mrs. Francis King, Liebesfeuer, Pink Perfection, Crimson Glow and Independence, glowing red and rose and pink, in stately four-foot spikes, were quite the most glorious tribute to the gardener's art that ever went from our show-rooms. They are equally gorgeous as a planting.

The soft yellow of Yellow Prince with lavender of Jacinthe or Badenia make a most attractive vase or gift box. The intense coloring of Mrs. Watt, a glowing American Beauty shade with buff or white varieties, or with the soft pink of Daybreak or Panama, has an unusual beauty. The new lavender Iris Spray is well placed with America and Niagara, or with Mrs. A. C. Beal. White Glory and Baron Hulot must be seen to be thoroughly appreciated.

Gladiolus Mrs. Dr. Norton is quite alone in its beauty. No other variety equals this in its class—silvery whiteness—with the dainty pink touches on the tips of petals. It is more like a veiled silvery pink.

Victory and Loyalty gardens will be much in vogue and we suggest a few plantings. For our own national colors we have tried many combinations, but find the Red, White and Blue of Mrs. Watt, Europa, and Baron Hulot the best of all varieties blooming at the same time.

The tricolor of France in pastel shades, as Helen Dryden puts it on *Vogue* covers, is perfectly reproduced by gladiolus Attraction, Europa, and Iris Spray or Jacinthe. Belgium will look very brave from a bed of Mephistopheles, Princeps and Golden King—all red and yellow and almost black. One can be very loyal to Greece with a planting of late blooming light blue larkspur and gladiolus Glory of Holland or Lily Lehman. Plantings typically English may be evolved with Princeps and Europa or Peace above a solid base planting of the bluest of blue Lobelia. Italy, cheery and bright with bloom of red Brenchleyensis or Mrs. Beecher—red, and Princess Sandersoni

for White, blooming from a bed of low-growing parsley.

The *Primulinus Hybrids* were increasingly beautiful and popular last year. The exquisite beauty of these gladiolus butterflies is difficult to describe. In form and color no other flower quite equals them. Smaller than the other types of gladioli, the daintiness of form and arrangement on the graceful spikes adds to their decorative value. They are not found in many florists' shops, for they are not the "big pumpkins" demanded by those who want quantity. Yet they are the coming gladioli. No two spikes of bloom are just alike and each seems more beautiful than the last. Colors ranging from the lightest primrose, through apricots, yellows, orange and bronze, to deep, rich rose and reds, all placed together in one vase, give a startling picture of nature's work of art. This year we are offering them in mixtures of all colors, also in selections of shades of apricot and yellow, or rose and bronze.

We have as a basis for our unqualified praise of these gladioli, the fact that almost every order for flowers or bulbs includes *Primulinus Hybrids*. They are, without question, unequaled for forcing.

We might give you combinations and arrangements to the end of the book, for the variety is endless, the combinations countless. But the true lover of nature will have little need of these suggestions—to copy nature is enough.

It has been demonstrated that for immediate effect or for cutting for home purposes, American grown bulbs surpass imported ones which have not become acclimated. A further point of interest is the selection of bulbs. It is a mistake to entertain the notion that size is virtue. It is essential that the bulbs should be of proper age, fully developed and healthy rather than soft and punky though large and overgrown.

In buying bulbs, as with any other commodity, it must be remembered that one who makes a specialty of producing can naturally give greater satisfaction to customers.

We have tried out several thousand varieties, but list only those which we know will give perfect satisfaction. Good things always endure, and no new variety will ever displace those Gladioli which have been so popular for years. New sorts are, however, well worth trying. If it is necessary to be mindful of expense, it is still possible to have a wealth of bloom for all purposes from the mixtures, which are sure to give satisfaction. But if money is no bar, no collection or garden will be quite complete without Crimson Glow, Iris Spray, Alice Tiplady, Mystery, Amethyst, Prince of Wales, Sunset, Hortense, Jacinthe, Wistaria and Day-break.

We repeat the invitation to visit the wholesale and retail packing rooms where the cut flowers are shown in their proper setting. The flowers in the fields are interesting, but one comes into a far better and more personal knowledge of type, variety, color, and marking by seeing them in arrangements which have helped to popularize this garden favorite.

I am not and never have been in the Gladiolus business purely for money. The Gladiolus lives with us, and I am anxious to have it live with you, and just as anxious to help you to grow it and help you to use it; and it will not be necessary to teach you to love it.

From these we have worked up a stock of bulbs which we are offering to the public this year. These French Primulinus are larger, of fine texture, and of the most exquisite tints. The Primulinus type is described in detail elsewhere in our booklet and because of their great popularity these new introductions will be of special interest to the lover and collector of choice gladioli.

Mixtures

We do not change the names of our mixtures from year to year, but the varieties do change, as each year new ones are added, making them the best that can be offered.

Amateur Mixture includes all the best varieties selected from the collections of the best hybridizers and growers of both American and European countries. All varieties have been selected with a view of eliminating all colors which do not harmonize either in cut flowers or garden planting, giving a most interesting and satisfactory mixture to grow. \$5 per hundred, \$40 per thousand.

Cedar Acres Mixture contains an endless variety of color, striped, variegated, mottled, as well as a fine selection of clear colors, with beautiful throat markings. In fact, the variety is unlimited and is sold at the low price of \$2 per hundred, \$18 per thousand.

Cedar Acres Seedlings. These introductions have been awarded numerous gold and silver medals and Certificates of Merit, and to induce large plantings of these seedlings, we are offering blooming size bulbs at the extremely low price of \$1.50 per hundred, \$12 per thousand.

Florists' Prize Mixture is the product of seedlings and selection, made up entirely of light colors, whites, creams, light rose and delicate pinks, and a great many with beautifully marked or penciled throats. These are most desirable, as the colors harmonize so well and give just the needed touch of effect for house or garden use. A mixture of exclusive quality, \$3 per hundred, \$25 per thousand.

No orders for these mixtures taken for less than twenty-five bulbs. Twenty-five at the hundred rate; 250 at the thousand rate.

Cultural Directions

The Gladiolus is a flower of easy culture and does well in any soil, but should be planted in full exposure to the sun. They will do well planted in the hardy borders or in front of shrubbery. Many of the best varieties produce small bulbs, and in buying a mixture you will find it much better when the size of the bulbs varies to a considerable degree. The largest bulbs do not always give the best results. It is essential that the bulb should be of blooming age rather than size. Soil should be well prepared in the early spring, with a good coating of agricultural lime and bone meal thoroughly worked into the soil, but fresh stable manure should be used only where the ground may be manured the previous fall and well worked over in the spring before planting.

The various ways in which the Gladiolus can be planted, make it one of the most showy and attractive garden flowers. Planted in round, oblong, or square beds, planting bulbs from four to six inches apart, so that they may be weeded and hand-hoed, they will give a wealth of color not equaled by any other flower.

Plantings for cut flowers should be made in rows eighteen inches apart, with bulbs three inches apart in the row, covering from four to six inches, according to the size of the bulbs; press the earth firmly around each bulb. Care should be taken to plant the bulbs right side up, and deep enough so that the new bulb, which forms on top, will not be pushed too near the surface. For succession of bloom, plant from the time the ground can be worked until July 1.

After the spike begins to show, all weeds should be removed, and if the soil is kept thoroughly worked, watering will hardly be necessary; they are great drinkers, however, and respond quickly to water. Always water after sundown.

There is no finer garden flower, but the finest specimens are shown if the spike is cut when the first bud opens and allowed to

develop in the house; every bud on stalk will open and the richest colorings result; this is also a benefit to the bulb. The flower-loving public must be educated to a willingness to cut the spikes when they have bloomed a little while in the garden, then to finish their development in the house. Nothing is more unsightly than a mass of ragged, betasseled Gladioli, when it is so easy to pick off the withered blooms.

In cutting the flower spikes, it is ruinous to cut the stalk where the flowers end. There must be some foliage to lend grace. Cut the spikes so as to leave two or three leaves on your bulb root thus giving you a flower spike sometimes nearly four feet long, leaving plenty of strength for the bulb, and beauty for the decoration.

In shipping cut blooms of the Gladiolus, it is absolutely essential that they be shipped dry, after standing for a while in water.

A great many varieties do extremely well under glass, and any one having a greenhouse should by all means force some of those varieties marked with an asterisk, allowing from twelve to thirteen weeks from planting to blooming time, with a temperature of about fifty-five degrees, or in carnation beds.

Bulbs should be dug as soon as the foliage turns brown or is cut down by frosts; cut stalks close to the bulbs. If possible, allow to cure in the sun or in a cool, dry place, then, removing old corm, store in trays or baskets, in a temperature as near forty degrees Fahrenheit as possible.

The above illustration shows the bulb as it looks when you dig it. The bulb you planted in the spring dies away and the new one forms on top, so that it is nearer the surface than the original planting.

Gladiolus Seed

Knowing that many people are interested, and would take pleasure, in growing new varieties, we are putting on sale seed saved from our choicest varieties, both hand- and field-fertilized. Cultural directions sent with each order on application. Per package, 25 cents. Trade packet, 50 cents.

To enable customers to make intelligent selection of named varieties, we will ship on application, through the blooming season, cut-flowers of the different varieties, properly labeled. Each request must be accompanied by a remittance of one dollar, to cover cost of box and labor of packing.
